

Supporting People and Advancing Research in Mitochondrial Diseases

Paula Morandi, Serena Massucci/ Mitocon – Insieme per lo studio e la cura delle Malattie Mitocondriali

Our Mission & Vision

Mitocon was founded in 2007 by a group of parents who, together, felt less alone.

Nearly 20 years later, together with patients, families, clinicians, researchers and the wider mitochondrial community, we support people living with mitochondrial diseases while promoting research, care and awareness.

Together, we are working toward a future where effective treatments for mitochondrial diseases — and ultimately their prevention — become possible.

Key projects - Research & Advocacy

Mitochondrial Replacement Techniques

Mitocon supports the Italian bill currently under discussion in the Senate on mitochondrial replacement techniques, aimed at preventing the transmission of mitochondrial diseases and opening new possibilities for affected families.

Key projects – Patients & Families

MITOCAMPUS

This is a project dedicated to children, young people, adults, and families living with mitochondrial diseases, creating opportunities for connection, support and shared experiences across the mitochondrial community.

Our Impact

Together, we are helping close the distance to new treatments.

 Research Funding	> 3 million
 Clinical Registry	> 2000 patients
 Mito Conference	15 editions
 Families / Patients Supported	> 200

Images

Other projects supported

- **Next Generation Talents**
Supporting and training young mitochondrial researchers
- **Seed Grant Program**
Funding innovative scientific research projects
- **MITO Conference**
Connecting the scientific community, patients and families
- **Patient & Family Helpline**
Information and support for everyday needs
- **Psychological Support Groups**
Dedicated spaces for listening, sharing and support

Insieme per lo studio e la cura
delle malattie mitocondriali ODV

Growing Together Since 2007

Research & Quality of Life

Conclusion

Together with the international mitochondrial community, we continue to support patients and families while building hope for the future.

Acknowledgements

Thanks to the international mitochondrial community and IMP for their continued collaboration and support.
